Iron and Steel | Welding Consumables | Industrial Tools | Valves and Valve Parts

Valves & Valve Parts

Ball Valve

High-performance valve for flow control in pipelines. Used in oil & gas, water treatment.

Globe Valve

For throttling flow and regulating pressure. Used in power and chemical industries.

Gate Valve

Opens or closes flow in pipelines. Common in oil & gas, water treatment networks.

Check Valve

Prevents backflow in pipelines. Ideal for water, oil, and gas systems.

Butterfly Valve

Quick shutoff valve with low pressure drop. Common in HVAC and irrigation systems.

Hex Nipples

Pipe fitting for secure connection between threaded components in industrial piping.

Lever Sleeves

Durable handle covers used in manual valves for grip and safety.

Industrial Consumables & Tools

Filler Wire

Essential for welding joints in fabrication and construction industries.

Boring Holder

Tool holder for precision machining operations in CNC and lathe machines.

Jaw Chuck

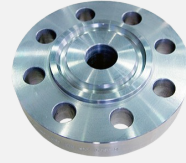

Workholding device for lathe and milling machines. Ensures stable rotation.

Flanges

Flanges

Mechanical components used to connect pipes, valves, pumps, and other equipment, providing easy access for cleaning, inspection, or modification.

RTJ Rings

Ring-Type Joints for high-pressure pipe flanges in oil & gas plants.

Packing Flange

Supports sealing and alignment of rotating equipment in pumps and valves.

Sealing & Fitting Components

PTFE Rings

Chemical-resistant sealing rings used in pumps, valves, and heat exchangers.

RPTFE Rings

Reinforced PTFE rings for enhanced strength in high-pressure environments.

Devlon Rings

High-load plastic seals used in marine, oil, and gas sectors.

Peek Rings

High-performance plastic seals for extreme temperature and pressure systems.

SS 316 Rings

Stainless steel sealing rings with corrosion resistance for industrial sealing.

Fasteners & Hardware

Washer

Used to distribute load and prevent wear in fastened joints.
Common in all assemblies.

Fasteners

Bolts, nuts, and screws for construction, manufacturing, and machinery assembly.

Rivets

Permanent fasteners for joining sheets in automotive, aerospace, and structures.

Accessories & Others

Tag Plates

Identification plates for equipment, machinery, and pipelines. Customizable.

Plastic End Caps

Protective closures for pipes, rods, and tubing during storage or transport.

Handwheels

Manual operating wheels used in machinery for position adjustments.

Fitting Hose

Comprehensive solutions for industrial pipe fittings and connections.
